To the Honorable Commissioner of Patents and Trademarks,

This letter I write is in addition to my patent application entitled THE TABLETOP SPIN-TUBE GAME, UTILIZING AN ELONGATED CYLINDRICAL PROJECTILE I am now submitting. I would like to assert my Small Entity status at this time.

I also want to say I have done a thorough search and nothing is comparable to this fantastic new indoor sports game I have invented.

I have completed my application without the help of an attorney though studied on the internet and read books on the subject. I believe there is potential to have a utility patent issuable and fully constituted.

I hope my game table invention gets fair and just time allotted to the research of it's patentability and issuance of claims. I am not questioning the ethics of the PTO at all. I just realize there is a big burden of applications you are inundated with every year and I don't want it to fall through the cracks in some respect.

Please thumb through my application, you might find it interesting. Thank you very much,

Sincerely,  
Steven J Schromm
